EXPERIENCE

Belgium	Freelancer	August 2018 - Current

Working on Belgium's top telco apps. Code run on **+100K** devices daily. **Swift 4, Objective-C, Core Data**

Antwerp, Belgium	Sentiance	December 2016 - August 2018

SDK used by **+100K users**. Interviewed dozens of candidates and served as **Squad Lead**. Tracked user **location** in the background. Stored and uploaded sensor data with **low battery impact** (~5% daily). **Refactored** the whole SDK while maintaining the old code base. Increased **test coverage** by 50%. Conducted support calls with international clients. **Objective-C, Background state, Core Location, Core Motion, GCD, NSOperation, Instruments.**

Remote	Bookizy	August 2016 - November 2016

Remote contract. Single-handedly implemented the first version of the **iOS app** and the **backend**. Delivered the project **on time** and on-boarded new developers. **Swift, Auto Layout, Push notifications, CocoaPods, Go, PostgreSQL.**

Brussels, Belgium	Immoweb	June 2015 - August 2016

Belgium's leading real estate platform (top 50 in Belgian App Store). Increased test coverage by 15%, reduced crash rates to less than 0.4%. Improved the CI environment and the UI tests. All these led to better rankings on the App Store and a more stable app. **Swift, Core Data, Auto Layout, Localization, Unit/UI Tests, Jenkins.**

Tokyo, Japan	Gengo	September 2014 - December 2014

Python developer. Internship. Implemented new features with the **Pyramid framework**. Quickly gained more responsibilities and implemented new **API endpoints** using the **Go language**. Created a **Swift** client for the Gengo API during my **free time**.

PERSONAL PROJECTS

Strongify - www.strongify.app

Workout Tracker app. About to be released. **Swift 4, Core Data.**

Dilemme - www.bit.ly/DilemmeApp

Fashion voting app. Responsible for the UI/UX and backend. Managed the project from the beginning until its release on the App Store. **Swift, Objective-C, Parse SDK, Facebook SDK.**

NEST'up - February - April 2015

Belgium's first **TechStars-style startup accelerator**. Selected as one of the 8 finalists (out of 50 teams). Learnt Lean Startup principles: **lean canvas, MVP, customer and solution interviews.**

EDUCATION

Brussels, Belgium	Université Libre de Bruxelles	September 2009 - June 2014

Master's in Computer Science – Software and critical systems design – **Great Honor**
Master's in Computer Sciences – Exchange year in Tokyo (International Christian University) – **Great Honor**
Bachelor's in Computer Science – **Honor**
